

Evidence of Children's UFO and Extraterrestrial Encounters to be Presented at a United Nations Affiliated Conference in Montreal

Wed Feb 22, 7:00 AM ET

(PRWEB) - Perth, Australia (PRWEB) February 22, 2006 -- A former registered nurse who has worked with hundreds of clients, including many children, will be revealing evidence of their encounters with extraterrestrial beings at an upcoming conference in Montreal, Canada.

After a decade of research as a professional counselor and clinical hypnotherapist, Australia's Mary Rodwell says that there is now enough evidence to conclude that these "beings" appear to come from other planets and other dimensions parallel to our own.

She will be making her presentation at the 31st annual conference of the International Institute of Integral Human Sciences (IIHS) taking place in Montreal May 5th to 14th, 2006.

The IIHS is a non-profit organization affiliated with the

United Nations Department of Public Information. It serves over 10,000 general members and students from many nations towards the convergence of new sciences with spirituality and universal human values, creating inter-religious and inter-cultural understanding for world peace.

Rodwell will be one of more than 60 speakers to address the IIHS, with other distinguished professionals such as medical doctors, psychiatrists, physicists, scientists, psychologists, spiritual leaders, and even a former

NASA astronaut (www.iihs.org).

She is a co-founder of the Australian Close Encounter Resource Network (ACERN), vice-President of Star Kids Project Ltd., founded by Dr. Richard Boylan, and the author of "Awakening: How Extraterrestrial Contact can Transform Your Life".

Rodwell says that after being involved with over 1,000 "experiencers" (alien abductees) nothing had prepared her for what she discovered.

“My clients include both adults and children who exhibit transformative changes such as telepathy, clairvoyance and healing as they become more spiritually aware and begin to operate on a multi-dimensional band of reality”, says Rodwell. “In the last 10 years, clients have come to me from the U.K, North America, Europe, Russia, Japan and South America”.

Rodwell also explains that part of her client’s contact experiences seems to inspire them to draw complex artwork, scripts, symbols and sometimes speaking strange languages.

“An eight year old has called her downloading of information ‘knowledge bombs’, as complex data conveyed through mental images and concepts seem to create a heightened consciousness level”, says Rodwell. “These ‘Star Children’ exhibit a maturity and wisdom beyond their years and often describe their connection to spirit and angelic realms”.

This former registered nurse is not the only one to have noticed a change with today’s children. A May 2005 USA Today article quotes James Twyman, producer of films on “Indigo Children”, as saying that a new generation of special children are among us who have increased telepathic abilities and are spiritually awakened.

The name “Indigo Children” comes from a blue indigo colored aura that some people say they can see around these children, as per a January 2006 New York Times article.

ABC News’ Diane Sawyers has also explored the issue of these extraordinary children in a November 2005 interview with an entire family of “Indigo Children”. Sawyers said that this phenomenon was “fascinating” and was “across the country”.

Rodwell explains that while many “Star Children” and “Indigo Children” have telepathic abilities, are spiritually awakened and often describe seeing “Beings of Light” (angels), the main difference is that “Star Children” have recollections of having had encounters with extraterrestrial beings and of sometimes having been on alien spaceships.

Though many medical professionals are still skeptical, in November 2003, Rodwell’s work was featured in the Australian Doctor Focus Magazine, a prestigious Australian medical journal.

Rodwell is not alone with her views as a growing number of professionals in the medical community share her conclusions and have spoken publicly.

Such people include the late world-renowned Harvard Medical School professor of psychiatry, Dr. John E. Mack, author of “Passport to the Cosmos”. and Dr. Janet Colli, author of “Sacred Encounters – Spiritual Awakenings During Close Encounters”. Dr. Colli will also speak at Montreal’s IIIHS conference.

Rodwell’s work continues to raise serious questions that were raised in February 2005 on ABC News by the late Peter Jennings in his two hour Primetime Special: “UFOs – Seeing is Believing”.

Jennings’ millions of viewers were presented with a small portion of the 150 interviews conducted by ABC in regards to the controversial and enigmatic issue of UFOs and extraterrestrial

encounters. Jennings concluded that many UFOs were indeed unidentified and that questions about their origin remained unanswered.

To Rodwell, the answer is that we are being visited by extraterrestrial civilizations. Her conclusion is echoed by the former Canadian Minister of National Defense Hon. Paul Hellyer, who, in September of 2005, went public saying that UFOs were as real as the airplanes that fly over our heads, and were indeed extraterrestrial vehicles.

During a December 2005 NBC News interview with Tucker Carlson, Hellyer quoted former high level

Pentagon officials as the source of his information. One of his sources includes an unnamed retired US Air Force General who spoke with him directly and confirmed that some UFOs were indeed "identified" and were piloted by extraterrestrial intelligences.

Hellyer is not the only politician who has raised the issue of UFOs. A CNN November 2002 article quoted

President Clinton's former White House Chief of Staff, John Podesta, asking for the Pentagon to come clean and to declassify their UFO files.

Podesta currently supports a Coalition for Freedom of Information lawsuit against NASA asking for the declassification of their top secret files in relations to the 1965 UFO crash in Kecksburg, Pennsylvania.

Though her evidence does not include an actual UFO, Rodwell says that she has evidence from a scientific, medical, psychological, and historical perspective to support her paradigm shifting conclusion that children are being evolved and transformed on many levels through extraterrestrial encounters.

This evidence will be presented in her first Canadian presentation in Montreal May 5th-14th, 2006 at the IIIHS conference. Rodwell is available for media interviews.
