1. The approximate date that I photographed President Kennedy talking to what I know to be an alien from other than this earth.
Answer: Approximately September 15 to the 20th, 1963. Yes, I am estimating, it was 38 years ago.
2. No, we drove about one hour to an airfield, the plane was a twin engine prop plane. I did not know the two men that accompanied me. The plane ride was 2 1/2 to 3hr long, both ways and it was dark therefor I did not see any landmarks. The men were in civilian clothing and they had side arms with them, including the pilot. There was a total of three men and of course myself.
3. It was obvious that the being was alien, he was a head taller than the president, and very thin, long arms, large black eyes, slanted up, dressed in what looked like a one piece gray jump suite, long thin fingers, this being conversed with the president for about 30min. they had an airline ladder up to the craft. The craft was (A-TIPACIL-) what I now know as a flying saucer type craft. The President waved to us and we left, went back to our plane and left, I did not see the craft land or talk off. There was a ground crew of undetermined amount, plus the tower crew, and undetermined security. I saw no one else, not even other planes.
4. I was there approximately 30min. All photos were taken by the men in black suites, Yes I tried to sneak some in the trash, however the men even took the trash.
5. I did not know any of them, I have never seen any since, and none have come forward. I was told that I would be eliminated if I ever came forward with the story. I will go on step further. I feel that President Kennedy was eliminated because he was going to come forward with news that would shake the foundations of the world, as we know it. I believe I told you that one of the men made a comment, this would never be told to the general population. All that know about this is ether dead or fearful of their life. I am dying any way, so what!

Thank you.
